

The Great Pet Debate: Dogs vs. Cats

Do more students prefer dogs or cats in the DH150 UX Design class?

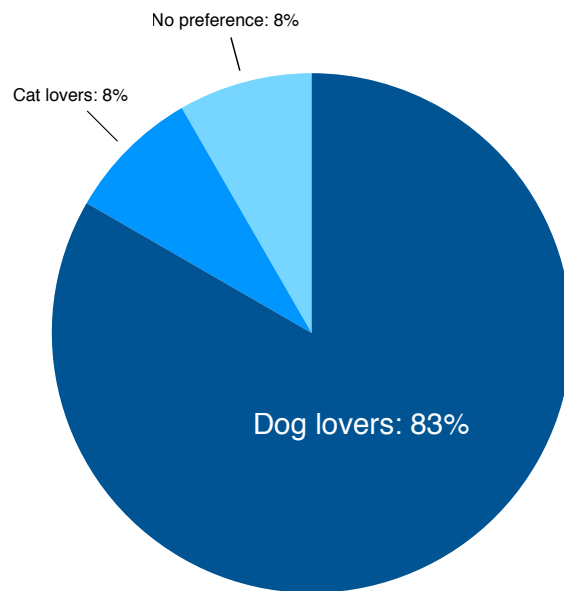

Data

Preference	Count
Dogs	20
Cats	2
No preference	2

Preference Breakdown

Preference	Count
Major Preference for Dogs	12
Slight Preference for Dogs	8
Neutral	2
Slight Preference for Cats	1
Major Preference for Cats	1

What percentage of DH150 students are dog lovers, cat lovers, or have no preference?

Among the students in the DH150 UX Design course, a majority preference was found wherein 83% of the students surveyed preferred dogs over cats. Of the data collected from 24 students, 20 students indicated a preference for dogs, two students indicated a preference for cats, and two students indicated no preference between cats or dogs. According to the preference breakdown, exactly half of the total sample of students indicated an extreme or major preference for dogs.

Drawing conclusions from this dataset alone, the verdict is out: *Dogs win the Great Pet Debate!*
